PROFESSIONAL SUMMARY

Full-Stack Developer with hands-on experience in the JavaScript/TypeScript ecosystem (React, Next.js, Node.js) and in process automation (RPA) with Python, working since 2025 on building scalable web applications and automating critical manual workflows in corporate environments. Proven track record of productivity gains through RPA, integration of relational and non-relational databases (PostgreSQL, MongoDB), cloud infrastructure deployment and management (Vercel, Supabase, Neon), plus network and hardware support. Computer Science student at UNIFOR (6th semester), with advanced English.

TECHNICAL SKILLS

Front-end: React, Next.js, Vue.js, TypeScript, JavaScript (ES6+), Tailwind CSS, HTML5, CSS3

Back-end: Node.js, Express, Java (Spring Boot), Python (Django), REST APIs

Automation & RPA: Python (Selenium, WebDriver, Playwright, PyAutoGUI, Webbrowser, Tkinter, OS), RPA (Robotic Process Automation), Web Scraping (FTP, inventory systems, web and banking data extraction), XML Data Extraction & Manipulation, Web Process Automation

Databases: PostgreSQL, MongoDB, Supabase, Neon, SQL

Cloud, DevOps & Infrastructure: Vercel, Git, GitHub, CI/CD Deployment, Network Support, Hardware Configuration & Maintenance, Help Desk

Data & Analytics: Pandas, Power BI, Streamlit (dashboards and automation catalog), Analytical Dashboards, Report Structuring

Tools & Methodologies: Figma, Trello, Miro, n8n, Scrum/Agile (sprints, team backlog organization)

PROFESSIONAL EXPERIENCE

IT Intern — Distribuidora Mais Saúde | June 2026 – Present

- Development and maintenance of internal applications in React, Next.js and Tailwind CSS, delivering modern, high-performance and responsive interfaces for business areas;
- Building and maintaining back-end services in Node.js integrated with PostgreSQL databases (Supabase), ensuring data consistency and availability;
- Development of **4 automation robots (RPA)** focused on automatically feeding folders into the **FTP** system and **web scraping** on web systems, transforming and structuring the collected data;
- Automated data collection and upload via FTP for two distinct distributors, **reducing process time from a full 6-hour shift to under 10 seconds** — a productivity gain of over 99%;
- Building analytical dashboards in Streamlit, used by the IT team as a centralized catalog of all robots developed, making it easier to track and maintain the automations;
- Responsible for the deployment cycle on the Vercel platform, applying version control best practices (Git/GitHub) and ensuring continuous stability of tools in production;
- Internal infrastructure support: inventory control, network support, machine setup/configuration and Help Desk service.

Apprentice – Tax Department (Systems & Projects) — Grupo 3corações | January 2025 – April 2026

- Development of **5 automation robots (RPA)**, focused on automated renewal of tax clearance certificates (CNDs) via web, file handling in folders, and large-scale data extraction from XML files;

- Automated interaction with web systems and automated filling of corporate spreadsheets from the extracted data;
- Conversion of critical manual processes into automated routines, eliminating rework and reducing operational errors in the tax department;
- Management of technical support tickets and creation/documentation of technical records for the systems developed.

RELEVANT PROJECTS

Central Mais Saúde — Ticketing System (Corporate Project)

Web-based ticketing system developed for internal use at Distribuidora Mais Saúde, focused on centralizing support requests and streamlining the workflow between business areas and IT. Authored project, from requirements gathering to production deployment.

Technologies: React, Next.js, Node.js, PostgreSQL (Supabase), Tailwind CSS, Vercel

Deploy: centralmaissaude.vercel.app / *Code:* private repository (corporate project)

Gamified Platform — São Carlo Acutis (Personal Project)

Development of a gamified Full-Stack web platform, focused on performance, scalability and user experience.

Technologies: React, TypeScript, Tailwind CSS, PostgreSQL (Supabase), Vercel

Code: github.com/andersoncataldo/CarloAcutis / *Deploy:* carlo-acutis-virid.vercel.app

Web Portfolio (Personal Project)

Creation of a modern, responsive personal portfolio, applying UI/UX best practices to showcase projects and professional experience clearly and objectively.

Technologies: React, TypeScript, Tailwind CSS, Vercel

Code: github.com/andersoncataldo/andersoncataldo.tech / *Deploy:* andersoncataldotech.vercel.app

EDUCATION

- **Bachelor's Degree in Computer Science** — University of Fortaleza (UNIFOR) | 01/2024 – In progress (6th semester).

CERTIFICATIONS & COURSES

- **HCIA-Storage V5.0 Course** — Huawei ICT Academy | Completed 06/2026

LANGUAGES

- Portuguese: Native
- English: Advanced
- Spanish: Beginner

SOFT SKILLS

- Teamwork and communication with non-technical business areas
- Proactivity in identifying manual processes suitable for automation
- Problem-solving and analytical ability under tight deadlines
- Organization and discipline in agile environments (sprints and concurrent demands)
