ANDERSON VIANA CATALDO

Full-Stack Developer | Automation & RPA | Applied AI (Python · TypeScript)

Fortaleza, CE, Brazil (Remote / Hybrid) | +55 85 99225-8794 | andersonvcataldo@gmail.com
LinkedIn: linkedin.com/in/andersonnviana | GitHub: github.com/andersoncataldo | Portfolio: andersoncataldotech.vercel.app

PROFESSIONAL SUMMARY

Nearly 2 years of corporate experience in technology and process automation, with recent focus on Full-Stack development (Next.js 16, React 19, TypeScript, JavaScript, Node.js, Python/FastAPI, SQL/PostgreSQL) and applied AI (Google Gemini API, OpenAI API). Hands-on experience with TOTVS WinThor ERP (Enterprise Resource Planning) on Oracle, RPA (Robotic Process Automation), automated testing (58 Pytest tests, 35 Playwright assertions), and agent-assisted workflows.

TECHNICAL SKILLS

Frontend & UI: TypeScript, JavaScript, Next.js 16, React 19, Vite 6, Tailwind CSS 4, Recharts, PWA (Progressive Web App), WCAG (Web Content Accessibility Guidelines) 2.1 AA

Backend & Databases: Node.js, Express, Python, FastAPI, REST APIs, SQL, PostgreSQL (Supabase), Oracle (TOTVS WinThor), SQLAlchemy, Alembic, Pydantic v2, RLS (Row Level Security), JWT (JSON Web Token), SSO (Single Sign-On), RPCs (Remote Procedure Calls)

Quality, Cloud & Infrastructure: Pytest, Playwright, Vercel Edge, Cloudflare Pages, Render, PM2, Git/GitHub, Streamlit

AI, LLMs (Large Language Models) & Agents: Google Gemini API (3.8 Flash / 3.5 Flash-Lite), OpenAI API, RAG / CRAG (Retrieval-Augmented Generation / Corrective RAG), Prompt Engineering, Function Calling, MCP (Model Context Protocol), Claude Code, Automated Evals

Automation, RPA & Integration: EDI (Electronic Data Interchange) Pharma Link, FTP/SFTP (File Transfer Protocol / SSH File Transfer Protocol), XML/XSD (Extensible Markup Language / XML Schema Definition), SEFAZ (State Treasury Department), PyInstaller, Google Apps Script

Academic & Complementary Knowledge: Java (Spring Boot), Django, Vue.js, MongoDB, SQLite, Power BI, Docker, Neon, n8n, Windows Task Scheduler, ftplib, WinSCP, Selenium, PyAutoGUI, BDD (Behavior-Driven Development), Figma, Trello, Miro, Git Flow

WORK EXPERIENCE

IT Intern - Distribuidora Mais Saúde | Jun 2026 - Present (Fortaleza, CE, Brazil - Hybrid)

- Developed features for the Central Grupo Mais monorepo (architecture and requirements defined by management) with JWT SSO, Next.js 16, React 19, FastAPI, Node.js, and Supabase with RLS, unifying 4 internal systems.
- Implemented a quality suite with 58 Pytest tests (E2E - End-to-End, authentication, and data protection), 35 Playwright visual regression assertions, and design system drift checks across 5 packages.
- Built a diagnostic engine in the Returns System using LLM calls via Google Gemini API and OpenAI API, Pareto analysis, heuristic fallback (< 1 s), and data anonymization aligned with LGPD (Brazilian General Data Protection Law) best practices.
- Created 10 Python automations integrated with TOTVS WinThor ERP on Oracle, including 4 EDI Pharma Link bots and FTP_SYNC, reducing manual routines from 6 h to under 10 s per cycle (median; >99.9% reduction).
- Structured an AI-assisted development workflow with 9 agents in a maker-checker model (Claude Code and MCP), accelerating deliveries with mandatory human review.

Apprentice - Tax & Projects - Grupo 3corações | Jan 2025 - Apr 2026 (Eusébio, CE, Brazil - On-site)

- Implemented monthly validation and processing of over 15,000 NF-e (Electronic Invoice) XML files against SEFAZ XSD schemas, achieving a 99.85% success rate.
- Developed 5 Python and RPA bots for automated CND (Tax Clearance Certificate) renewal and batch fiscal extraction.
- Automated web portal queries and corporate spreadsheet generation in Python, saving over 200 cumulative hours of manual work.
- Authored technical documentation and contingency playbooks for automation bots while handling operational support tickets for the tax team.

PROJECTS

- **Central Grupo Mais & Corporate SSO (Private code - company):** Full-stack monorepo in Next.js 16, React 19, Vite 6, Node.js, Express, FastAPI, and PostgreSQL (Supabase) with RLS unifying 4 internal systems via JWT.
- **Web Portfolio & Anderson AI Assistant:** React 18, TypeScript, Tailwind CSS 4, Vite 6, Vercel Edge, Supabase (L1/L2 cache, RPCs), Gemini 3.8 Flash / 3.5 Flash-Lite, OpenAI fallback, CRAG, 95 evals with no hallucinations detected, WCAG 2.1 AA, PWA. Live | GitHub
- **Corporate Service Desk System - Mais Saúde (Private code - company):** Internal platform with RBAC (Role-Based Access Control), SLA (Service Level Agreement) tracking, MTTR (Mean Time To Repair) metrics, and Recharts dashboards.
- **AI-Powered Reverse Logistics & Returns (Private code - company):** Application in React, Vite 6, FastAPI, SQLAlchemy, Alembic, Pydantic v2, and Pytest featuring LLM diagnosis, Pareto analysis, anomalies, and fallback (< 1 s).
- **FTP_SYNC & WinThor EDI Engine (Private code - company):** Autonomous Python sync every 15 min between partner FTPs and TOTVS WinThor Cloud SFTP in EDI Pharma Link layout.
- **Autonomous AI Agent Squad (Personal research project - local repo):** Multi-agent orchestration in Node.js with Google Gemini API and PM2 process management.

EDUCATION

Bachelor of Science in Computer Science - University of Fortaleza (UNIFOR) | 2024 - Dec 2027 (expected; 6th semester)

CERTIFICATIONS

Huawei HCIA-Storage V5.0 - Huawei ICT Academy | Jun 2026 (Enterprise Storage, SAN/NAS - Storage Area Network / Network-Attached Storage, RAID - Redundant Array of Independent Disks, Disaster Recovery)

LANGUAGES

Portuguese (Native) | English (Advanced) | Spanish (Basic)
